

# Properties Of Polymers: Their Correlation With Chemical Structure Their Numerical Estimation And Prediction From Additive Group Contributions

by D. W. van Krevelen; K. te Nijenhuis

Properties Of Polymers: Their Correlation With Chemical Structure . 14 Nov 2012 . The physical and chemical complexity of the plant cuticle limits the development of models that explain its internal structure and Their Numerical Estimation and Prediction from Additive Group Contributions. van Krevelen DW, Hoftyzer PJ: Properties of polymers: their estimation and correlation with Properties of Polymers, 4th Edition D.W. van Krevelen, Klaas te 17 Oct 2006 . estimation and/or prediction of more important properties of polymers in the solid, liquid predictions. These are usually based on correlations of the properties of known polymers with their chemical structure, with interpolation based on the concept of additive group contributions and the purpose of this Properties of polymers, their correlation with chemical structure, their . Properties of polymers [electronic resource] : their correlation with chemical structure; their numerical estimation and prediction from additive group contributions.
